

Features

- If a sensor fails or reaches the end of its serviceable life, swap the cartridge for a new one in minutes
- Quickly convert a G7 device from a single-gas to a multi-gas monitor simply by changing the cartridge
- G7 sensors and pumps feature a lifetime warranty
- All cartridges are compatible with G7 Dock for straightforward bump tests and calibrations
- G7 devices communicate all data to the Blackline Safety Network, eliminating the need to manually collect data from the field
- Comprehensive confined space entry and leak check work flows are available from devices fitted with a pump cartridge
- Automated mapping of confined space entries, gas exposures, usage and alerts

PLUG-AND-PLAY G7 CARTRIDGES

G7 delivers complete customisability, with an exclusive modular design to accommodate diverse gas detection and safety monitoring needs.

Standard Cartridge (lone worker)

G7 devices equipped with a standard (no-gas) cartridge function as personal safety and lone worker monitoring devices. G7's with a standard cartridge monitor the safety of workers and alert live monitoring personnel in the event of an emergency, fall or health event.

Single-gas diffusion Cartridge

Single-gas cartridges provide targeted gas detection for environments with specific gas hazards. Most G7 gas sensors are compatible with the single-gas cartridge.

Multi-gas diffusion Cartridge

Multi-gas diffusion cartridges support two to four gas sensors and up to five gases when fitted with a twin-tox COSH sensor. Our multi-gas diffusion cartridge supports all sensors in the G7 portfolio.

Multi-gas pump Cartridge

G7 devices with a multi-gas pump cartridge can monitor up to five gases (when fitted with a COSH sensor) and feature an internal pump. Ideal for confined space entry and leak check applications, users can turn the pump on and off on-the-go and temporarily change G7's functionality using configuration modes — every setting is customisable online through the Blackline Live user portal.
